

Imaging innovations that empower advanced & interventional pulmonologists

from diagnosis to treatment in both routine and complex procedures

Fujifilm's ELUXEO® Endoscopic Imaging System and full portfolio of bronchoscopes, EBUS scope, and ultrasonic radial probe system deliver clarity, versatility, and accessibility to enhance practice performance in high volume settings, backed by industry-proven technology service and support.

Introducing the EB-710XT Bronchoscope

The remarkably slim 5.8mm distal with an ample 3.2mm working channel.

Accessing the periphery just got easier

The sleek Fujifilm EB-710P empowers a variety of biopsy applications for peripheral lesions.

Optimal visualization in convex EBUS

Count on the EB-530US for reliable diagnosis, staging & precise puncture action.
